#1 Ron Jones is requesting a Variance to transfer 205 certified acres with no reduction in certified acres due to historical use, from the NE 9-1-38 to NE 4-2-39 and NW 10-2-39 which are currently satellite acres. The NE ¼ of 4-2-39 will receive 130 certified acres and will be watered by the well in NW 3-2-39. The NW ¼ 10-2-39 will receive 75 certified acres and will be watered by the well in NE 10-2-39. The remaining 114.4 certified acres on the NE ¼ 9-1-38 will be decertified and the well, G-068463 will be decommissioned. The NE 9-1-38 does not have a recent historical use but they would like to move the certified acres to more efficient wells and bring certified acres to their satellite acres. Based on historical use 0.0 acres are transferable from NE 9-1-38, and the well has an SDF of 23.2%. The well on NW 3-2-39 has an SDF of 14.4% and the well on the NE 10-2-39 has an SDF of 14.3 % for an SDF decline of 8.8%.

- Stromberger on behalf of the Variance Committee recommends denying the Variance request of Ron Jones.

Roll call vote: 10-yes, 1-absent. Motion carried.

Martin is requesting to transfer 180.8 certified acres from the NW ¼ 12-6-42 and 64.1 certified acres from SWA 30-7-41 to W ½ 5-6-41 with no reduction in certified acres due to historical use or SDF increase and to develop two new pivots. The NW 12-6-42 is sandy ground with high erosion and the well on SWA 30-7-41 is sucking air. The W ½ 5-6-41 is better ground and has better water. The well on NW 12-6-42 has an SDF of 18.3%, the well on SWA 30-7-41 has an SDF of 18.5% and W ½ 5-6-41 has an SDF of 31.3 % for an SDF increase of 12.9%. Based on
